

Quicklist

RUN A GREEN MAINTENANCE SHOP

- ☞ Store solvents, solutions, fluids, oils, antifreeze and other materials safely
- ☞ Keep the shop clean and dry
- ☞ Change fluids carefully, as far from drains as possible
- ☞ Minimize and manage waste from brake and part-cleaning systems
- ☞ Minimize and manage used solvent, wastewater and spills
- ☞ Recycle used solvents, solid waste, waste oil, antifreeze and fluids
- ☞ Develop an oil life extension program, switch to reusable filters
- ☞ Invest in new aqueous brake and part-cleaning equipment
- ☞ Ensure everyone is well trained and equipped for safety and sustainability

MANAGE SPILLS, WASTEWATER AND WASTE CAREFULLY

- ☞ Implement Healthy High Performance Cleaning Program via Johnson & Johnson with environmentally-friendly, water-based cleaning products
- ☞ Always keep spill cleanup equipment and supplies on hand
- ☞ Use absorbent materials instead of water for cleanups
- ☞ Capture contaminated wastewater and dispose of it correctly
- ☞ Recycle vehicle wash water when possible
- ☞ Dispose of non-recyclable, hazardous materials such as paint, filters, fluids, sludge and cleanup materials properly and legally
- ☞ Make sure everyone is trained to deal with spills, wastewater and waste correctly

FUEL VEHICLES SAFELY

- ☞ Have a designated fueling area, with spill containment and cleanup materials
- ☞ Post fueling instructions and train everyone
- ☞ Inspect and test fueling equipment regularly

MINIMIZE NOISE AND ITS EFFECTS

- ☞ Identify problem areas and take corrective actions
- ☞ Provide protective equipment and training
